# Aranda Password Recovery

Learn about the latest releases of Aranda PASS RECOVERY APR.

Here you can access the latest updates to APR features.

## Release Notes APR 9.0.2

### User display failed

### CASE PM-53829-19-201598:

Previously, in the APRAdmin, in the User Configuration >, scrolling to the bottom of the list would cause the page to load, but users would disappear from view.

An adjustment has been made. Now, by scrolling to the bottom of the list and loading the page, users will remain visible.

### Password Policy Display Failed

### CASE PM-62778-19-201728:

Previously, on the consoles of APRAdmin and APRUsers, password policies were not displayed when in the APRAdmin the Organizational Unit (OU) in the Domains > BaseDn.

An adjustment has been made. Now, when you set up the Organizational Unit (OU), you can view password policies on both consoles.

### Template configuration error

### CASE PM-63918-19-201750:

Previously, in the APRAdmin, in the Templates, when modifying a template and saving the changes, the changes were not reflected when validating again.

An adjustment has been made. Now, when you modify a template and save the changes, they will update correctly.

## Installers 9.0.2

### Download link

- [Aranda.APR.Installer.9.0.2.exe](Aranda.APR.Installer.9.0.2.exe)
