Release Notes

Release Notes Aranda Software Metrix 8.4.6

Adjustments are made to the product to ensure correct operation in environments (HTTPS) when the TLS 1.0 protocol is inactivated both in the Database server and in the Application server.

- ▮ NOTES OR ADDITIONAL INSTRUCTIONS:
- Run the “Aranda.ASM.Installer.exe” file and follow the installer’s instructions.
 - The executable file functions as both an installer and an update tool.
 - This update applies only to databases in version 8.0.104

Release Notes Aranda Software Metrix 8.4.5

CASE 11138:

Adjustments are made in the Metrix Web Console (ASM) so that selecting menu options that are within the same main menu option and that point to the same URL highlights the selected option. If the selected menu option points to a different URL, the option is not highlighted.

CASE 11124:

Added the delete attachments button in the Metrix Web Console (ASM) invoice and contract editing. Deleting an attachment removes the relationship between the file and the invoice or contract, however, it does not delete the AFS file in order to prevent it from being disassociated from the other invoices or contracts that have it associated with it.
